

CM SERIES

The CM fittings are realized in acetate polymer. L'O-Ring is made in rubber EPDM for food, so this particular selection of products can be used for water application into industry field. It is also indicated for other liquids always in food industry. Intermittent hot water are also other example of possible applications.

C1 series is not indicated for air compressed o vacuum.

In case of these applications we normally suggest the PM series.

Pressure of working

Water 10 bar - 20 °C

7 bar – 65 °C intermittent
